Subject: OU7 Samples

;

Hi Dante,

The OU7 sampling program is going well. We have a number of samples locked down and refrigerated, ready for shipment this week. Dietrick is getting the COCs completed and we'll be sending them out shortly. I will forward the tracking information when we have it. Because of the analytes of concern for this program, the six month holding time is not a huge concern right now.

We have been in fairly consistent contact with Kevin O'Leary at CB&I regarding the sampling program and the status of samples. Additional sampling is continuing into next week. We will keep you posted on the status of those samples COCs and shipment status.

Please let us know if you have any questions.

Thanks,

Sarah Peters EI CEM
